

Our flight cases are used throughout a wide range of industries including the broadcasting, audio visual, theatrical and computing sectors to name but a few.

Manufactured from a wide choice of materials including Diamondboard, Astroboard and Aluminium & PVC coated plywood, Excelsior also offer a variety of colours, fittings, castors and internal foam protection options.

Flight case manufactured for the new Microsoft XBOX games console. Each new console was shipped to leading games stores across Europe in one of our cases.

Flight case to house a monitor and laptop for a customer who tracks and logs go-karting results at the racecourse.

We offer a range of materials, fittings and colours, for whatever size you require.

Having designed and built custom flight cases for blue chip organisations like the BBC for several years, no matter what sort of equipment you wish to transport we can always provide a solution to meet your needs.

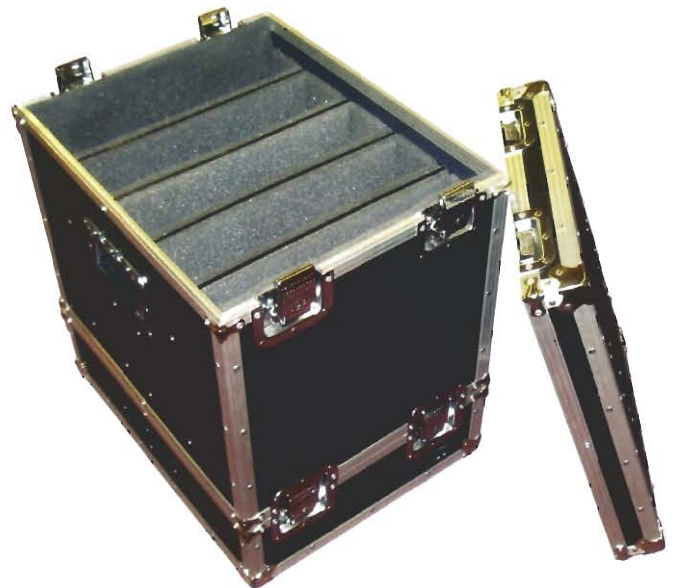

When designing flight cases we always ensure that our customers are fully involved at every stage, and we guarantee to offer you the best possible professional advice and field sales support whenever required.

«« 2.2 metre long Flight case manufactured for Red Bee Media (BBC) to house two Plasma screen stands.

«« Flight case manufactured for Red Bee Media (BBC) to house cables.

«« Flight case manufactured for Zentec Solutions Ltd to house laptop computers.

Whether it's plasma screen cases, laptop cases, computer cases or even briefcases, if you are looking for a custom made flight case that will last for years, look no further!
